

30-Day Jumpstart

“Fast track your first integration”

Go Live in Just 30 Days

Embark on your integration journey with confidence. Our 30-Day Jumpstart program is designed to get your first embedded integration live within 30 days. Collaborate with an Integry Architect, System Integrator, and Success Manager to ensure your project's success.

Overview

The 30-Day Jumpstart is a focused, mini-project that accelerates your integration deployment. Our dedicated team works closely with you to plan, implement, and launch your first integration within 30 days. This program is perfect for organizations looking to quickly realize the benefits of Integry's platform while minimizing internal development efforts.

Best If You're...

Looking to Launch Quickly

You want to deploy your first integration without delay.

Looking to Minimize Development Effort

You aim to reduce workload on your team while achieving your integration goals.

Seeking to Familiarize Your Team with Integry

You want your team to quickly understand and adopt the Integry platform.

Facing Unknowns in Integration Projects

You wish to identify and eliminate unknowns rapidly to mitigate risks.

Uncertain About Third-Party Collaboration

You haven't worked with third-party teams before and need clarity on organizational and work boundaries.

Enterprise Plan Subscribers

This program is included with your Enterprise plan but is also available for separate purchase.

Key Benefits Include:

- ▶ **Rapid Deployment**
Get your first integration live in just 30 days.
- ▶ **Minimized Development Effort**
Reduce the workload on your engineering team with our expert assistance.
- ▶ **Team Familiarization with Integry**
Quickly get your team up to speed with our platform.
- ▶ **Risk Mitigation**
Identify and eliminate unknowns early to ensure project success.
- ▶ **Clear Organizational Boundaries**
Gain clarity on collaboration with third-party teams.
- ▶ **Dedicated Expert Team**
Collaborate with an Integry Architect, System Integrator, and Success Manager.
- ▶ **Flexible Engagement**
Included in the Enterprise plan or available for separate purchase.

Outcomes

- ▶

Successful Integration Launch
Get your first user or customer live with the integration at the end of 30 days.
- ▶

Accelerated Time to Value
Quickly experience the benefits of integration for your business.
- ▶

Knowledge Transfer
Your team gains valuable insights and training on the Integry platform.
- ▶

Foundation for Future Integrations
Establish a roadmap for subsequent integrations with confidence.
- ▶

Reduced Internal Effort
Minimize the development workload on your team.

Activities

- 

Kick-Off Meeting
Establish objectives, scope, and timelines with your dedicated team.
- 

Use-Case Definition
Identify and finalize the integration use case that aligns with your business goals.
- 

Architecture Planning
Design the integration architecture with the guidance of our Integry Architect.
- 

Implementation
Our System Integrator collaborates with your team to build and configure the integration.
- 

UI/UX Creation
Implement user-facing forms to collect information to setup integrations.
- 

Testing and Quality Assurance
Rigorously test the integration to ensure reliability and performance.
- 

Weekly Check-Ins
Regular meetings to track progress and address any concerns.
- 

Dedicated Customer Success
Continuous support from a Success Manager to ensure your objectives are met.
- 

Dedicated Slack Channel
Real-time communication for swift collaboration and issue resolution.
- 

Launch Preparation
Finalize deployment plans, including user onboarding strategies.
- 

Go-Live Support
Assist with the official launch and address any immediate post-deployment needs.
- 

Project Review
Evaluate the project's success and outline next steps for ongoing integration efforts.

Support Model

- ▶

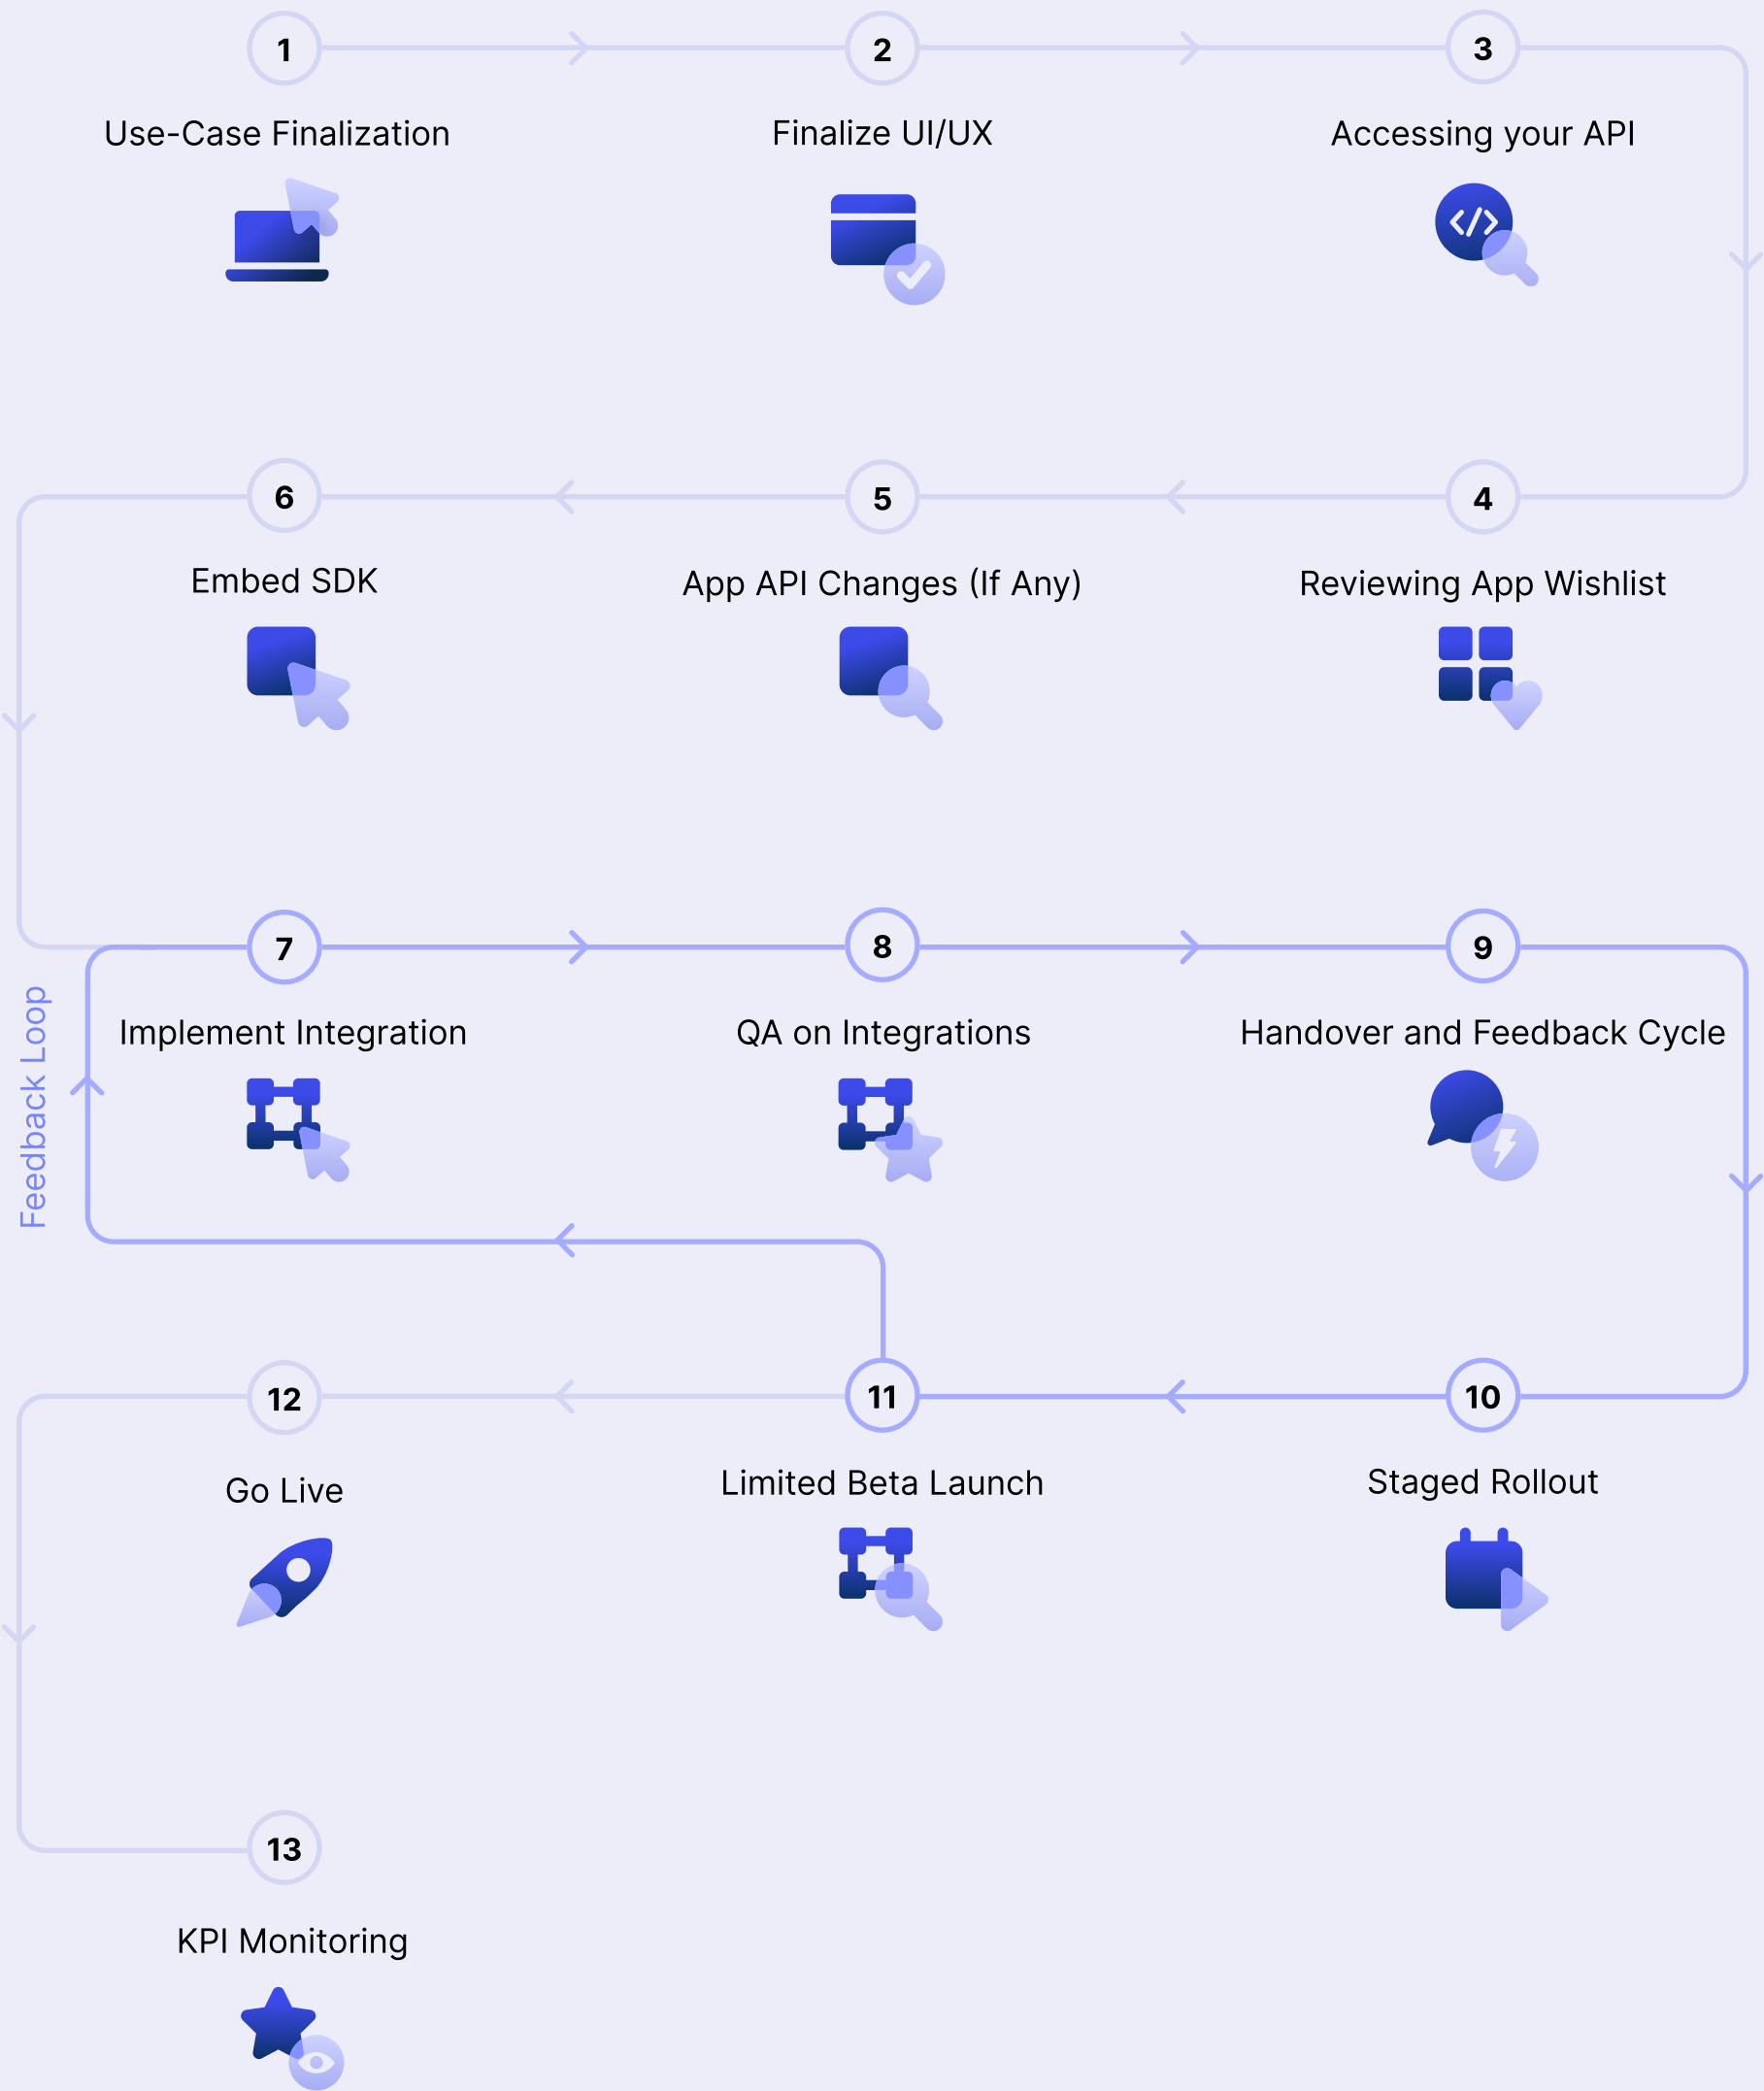

Dedicated Team
Access to an Integry Architect, System Integrator, and Success Manager throughout the project.
- ▶

Multiple Communication Channels
Stay connected via email, video calls, and a dedicated Slack channel for real-time collaboration.
- ▶

Responsive Assistance
Prompt support to address questions, concerns, and technical challenges.
- ▶

Knowledge Resources
Provide documentation and training materials to empower your team.

Customer Onboarding Process

Technical Requirements

- ▶ **Integry SDK Embedding**
You will need to embed the Integry SDK, requiring front-end work and some back-end work for storing URLs.

▶ **Engineering Bandwidth**
Availability of your engineering team to collaborate and implement necessary components.

▶ **Candidate App and Flow Ready**
Have one candidate app and its flow ready for integration (e.g., set up a live two-way sync between your app and QuickBooks).
- ▶ **API Access and Availability**
An API is recommended to maximize integration capabilities but is not mandatory to begin with.

▶ **Time Allocation for Collaboration**
Active participation from your team to provide necessary information and feedback.

▶ **No Additional Infrastructure**
We handle the backend management, allowing you to focus on your app.

Note:
While we endeavor to get you live in 30 days, the timeline may expand due to work needed on your side. Your commitment and timely collaboration are crucial for meeting the deadline.

Security and Compliance

-  **Enterprise-Grade Security**
Data is encrypted both at rest and in motion using AES and RSA encryption.

 **Compliance Standards**
We comply with SOC 2, GDPR, CCPA, and HIPAA, ensuring the highest security and privacy standards.

 **Data Minimization Practices**
We treat data as a "toxic asset" to minimize exposure and enhance security.

Pricing Details

- ▶ **Included with Enterprise Plan**
The 30-Day Jumpstart is added by default when you subscribe to our Enterprise plan.

▶ **Standalone Purchase**
Available for separate purchase if you wish to experience our platform before committing to a full plan.

▶ **Customized Quotes**
Contact our sales team for detailed pricing tailored to your specific needs.

Expert Services

Our 30-Day Jumpstart program is led by seasoned professionals:

-  **Integry Architect**
Designs the technical architecture and ensures alignment with best practices.

 **System Integrator**
Implements the integration, handling the technical configuration and setup.

 **Success Manager**
Oversees the project timeline, coordinates activities, and ensures your objectives are met.

Customer Success Stories

Brevo

Brevo
Integry helped launch Brevo's RSS-to-email campaign flow where a user could use their blog's RSS to send email.

Livestorm

Livestorm
Integry worked with Livestorm to launch Salesforce and Paradot flows with two-way syncs.

unlayer

Unlayer
With Integry, Unlayer customers could create custom email designs and push them to nearly a hundred email providers.

Frequently Asked Questions (FAQs)

- Q:** What if we need more than one integration during the 30-Day Jumpstart?

A: The program is focused on launching your first integration. For additional integrations, we can discuss expanding the scope or transitioning to our Managed Flow service.

Q: Can we choose any integration for the Jumpstart program?

A: Yes, we'll work with you to select a candidate app and its flow that provides immediate value and aligns with your business goals. For example, setting up a live two-way sync between your app and QuickBooks.

Q: Is training provided during the program?

A: Yes, part of the Jumpstart includes knowledge transfer and training to empower your team and familiarize them with the Integry platform.
- Q:** How much time will our team need to commit during the 30 days?

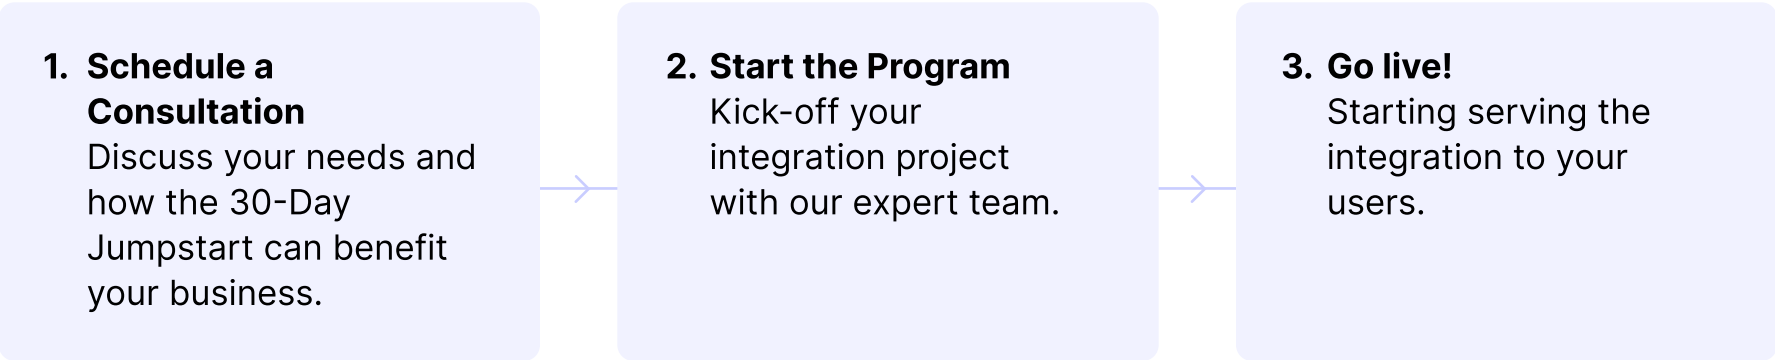

A: Your team's active participation is essential. You'll need to allocate engineering bandwidth for embedding the Integry SDK, back-end storage for URLs, and time for collaboration.

Typically, it takes a week of engineering. If there is API development needed, the development time varies per organization but 1-2 weeks is typical.

Q: What happens if we can't meet the 30-day timeline?

A: While we strive to launch within 30 days, the timeline may extend due to dependencies on your side. We'll work closely with you to adjust the plan as needed and ensure a successful launch.
